

CLEAN WITH CONFIDENCE™

VOLT™ 2.5G

ELECTROSTATIC

2.5-GALLON LITHIUM-ION BATTERY POWERED
ELECTROSTATIC BACKPACK SPRAYER

Introducing the all-new Volt™ 2.5 Gallon Electrostatic Backpack sprayer! Designed to make sanitation & decontamination projects faster and easier, the Volt™ can spray for up to 6 hours with a lightweight spray gun. Simply fill up your sanitizing solution in the backpack and strap on the ComfortStraps™ to start spraying!

LIGHT-WEIGHT DESIGN

Our backpack design places the spray liquid, pump, and 18V battery all on your back so that you can Clean with Confidence™ with the lightweight spray gun. With the solution weight on your back, there's no more excessive pressure on your wrists for all-day spraying.

TURBO-BOOST™ ELECTROSTATIC FAN

The Volt™ electrostatic spray gun incorporates a Turbo-Boost™ fan to disperse droplets even further. Because of the misting nozzles dispersing quickly, the fan gives droplets the extra push to travel further than before to sanitize those hard to reach places.

3X MISTING NOZZLES INCLUDED

Choose your droplet size from options of 40, 80, or 120 micron stainless steel nozzles to sanitize effectively based on the job. The quick-connect system makes swapping nozzles a breeze.

COMFORTSTRAPS™

A padded, vest-style strap design promotes comfort and security. ComfortStraps™ are covered with a layer of mesh around your chest and waist, allowing air flow to keep you cool while you work.

SMALL ACCESSORY POUCH

Store all your small accessories in one convenient place! Located on the waist of the ComfortStraps™ makes accessing and switching nozzles out a breeze.

SPECIFICATIONS

Tank Capacity:	2.5-Gallons/10-Liters
Gun:	12V Grounded Electrostatic
Polarity:	Positive Ions
Charge Output:	Positive 2000-3000V
Coverage per Battery Charge:	Up to 40,000 ft ²
Battery:	18V / 5.2 Ah Lithium-Ion
Spray Time:	Up to 4 Hours on Turbo-Boost™
Hose:	300 psi Nylon PVC
Fittings/Nozzles:	Stainless-Steel
Included Nozzles:	40/80/120 Micron Misting
